EXPERIENCE

Full Stack Developer — Nashville Software School

April 2019 - October 2019 - 6 months, Nashville

Intensive full-time 6-month software development Bootcamp anchoring learning with both individual and team-based projects.

- Designed frontend web-applications using HTML, CSS, and JavaScript
- Employed Grunt, Browserify, ESLint on several JS projects
- React.js up-to-date with all the latest tooling (hooks, router, components, redux, context API, reusable API, etc.)
- Built Application Program Interfaces, Console Applications, and Model View Controls using C# .NET and Azure Data Studio.

Free Lance Infographic Designer — Tennessee Trade Association

October 2018 - January 2019 - 4 months, Nashville

- Utilized graphics to enhance patterns and trends regarding legislation
- Applied statistics and data analysis methods within the field of law
- Acted with the Association to pass bills through the Tennessee General Assembly

Fitness Instructor — Climb Nashville

February 2017 - August 2018 - 1 year, Nashville

- Instructed and mentored indoor climbing, belaying, and safety procedures to customers of all ages
- Reviewed gym operations and ensured space was kept clean
- Provided customer service and proactively sold equipment, memberships, and gear

Kitchen Manager — Sloco

February 2016 - July 2017 - 2 years, Nashville

- Held management position directing and supervising a team of 6 - 10 kitchen staff
- Ensured smooth operations by overseeing daily product inventory and purchasing
- Prepared meals in high volume with precision and attention to dietary restrictions
- Bartended and monitored customer experience

ABOUT ME

I have carried a passion for science and technology throughout my whole life. Software Development is a way for me to combine logic with creativity and work in an industry with endless learning opportunities. I'm enthusiastic about creating interactive experiences, problem-solving, and working with teammates to develop software that is functional and sleek in design.

INDUSTRY KNOWLEDGE

Object-Oriented Programming
Object-Oriented Design
S.O.L.I.D Principles
Algorithms
Data Structures
Databases
Basics of Testing
User Interface
Interactive Design
Wireframing
Source Control
Software Development Life Cycle
